

Emotions in the Movies

Andrew Salway, Uni Digital

UiB Visual Studies Research Group
7th October 2010

Archives of Visual Information

- Personal media collections
- Commercial image libraries
- Online art galleries
- Collaborative image and video collections
- Online television stations and film studios
- The web at large

What tools are there for searching images and videos now and in the future?

Artist= “Henri Matisse”

PictureOf(Eiffel Tower, Paris)

Film Title = “The English Patient”

Narrative

- A **story** is a chain of ***events***, in ***cause-effect*** relationships, organised in ***space*** and ***time***. The agents of cause-effect are ***characters*** with ***goals***, ***beliefs*** and ***emotions*** (Bordwell and Thompson 1997).
- "More than reconstructed timelines and inventories of existents, **storyworlds** are ***mentally and emotionally projected environments*** in which interpreters are called upon to live out ***complex blends of cognitive and imaginative response***, encompassing sympathy, the drawing of causal inferences, identification, evaluation, suspense, and so on" (Herman 2002, p. 17).

Multimodality

- Storytelling in film combines the ***moving image*** with ***dialogue, sound effects, music*** and sometimes a narrator.
- For a particular film, there may be several “collateral texts”, e.g. ***screenplay, subtitles, audio description*** and maybe a novel.

New ways to study visual culture?

Data-driven vs hypothesis-driven

In a data-driven paradigm, provided with a large-scale data set, systems can induce and analyze patterns of information via the implementation of relatively simple models to process massive data collections on high-power computing platforms.

(Halevy, Norvig and Pereira 2009)

New ways to study visual culture?

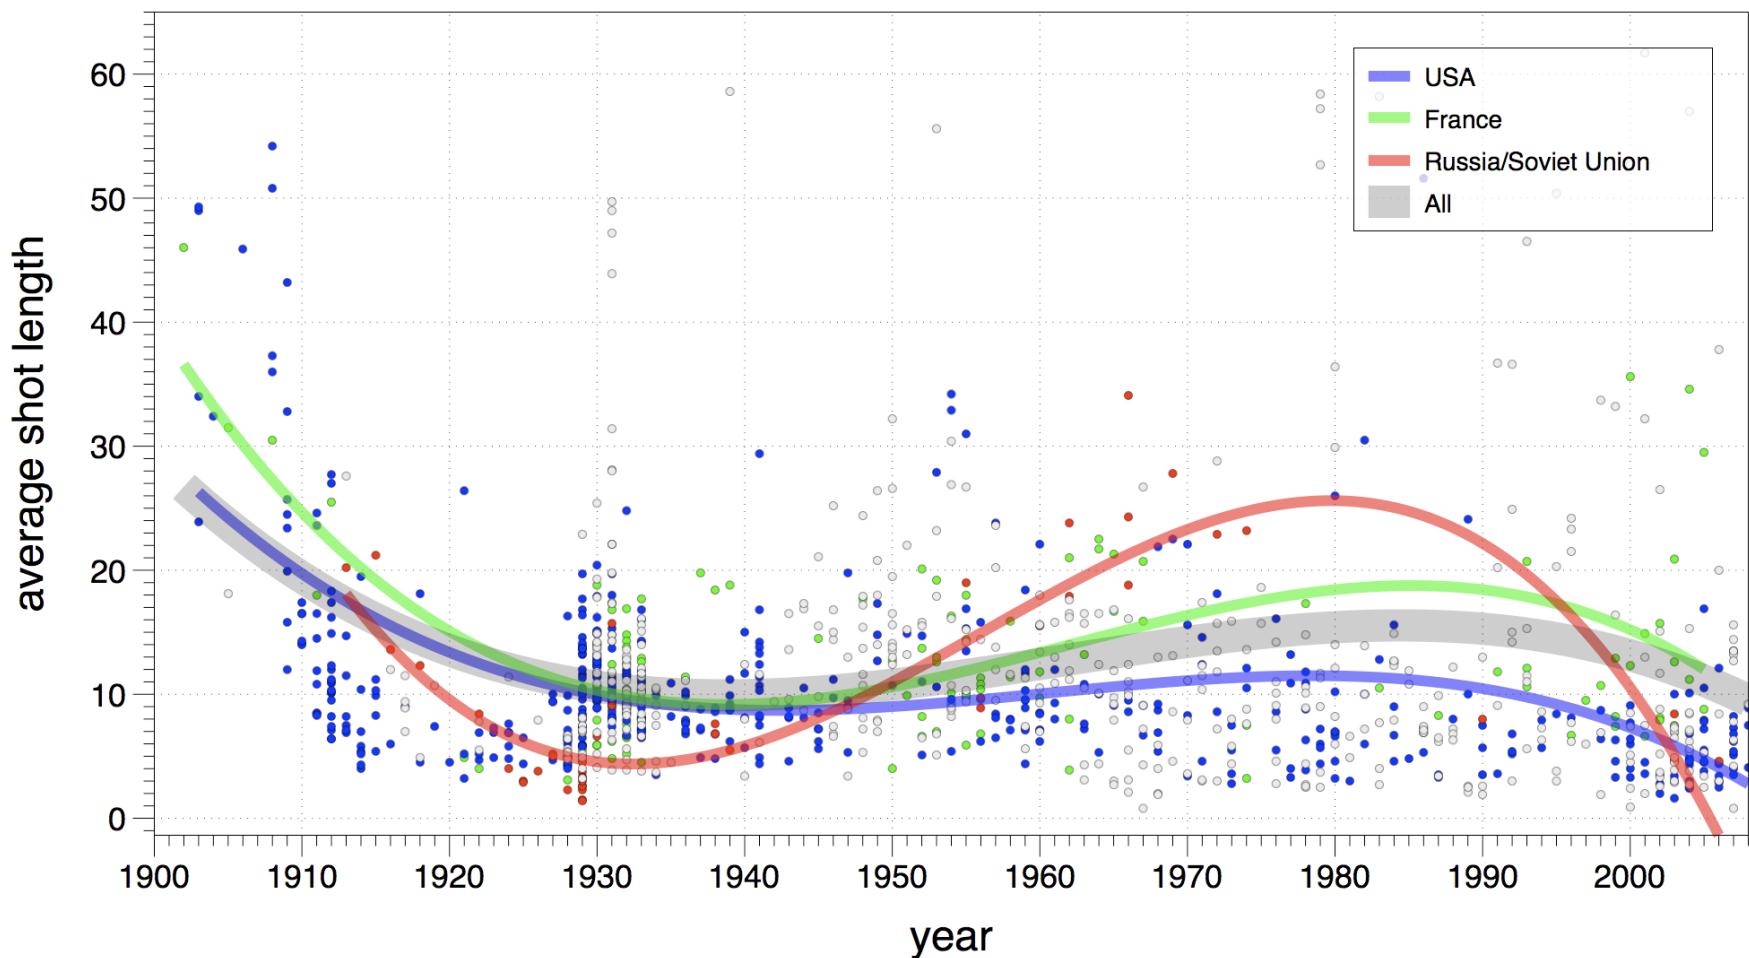

“With books, newspapers, journals, films, artworks, and sound recordings being digitized on a massive scale, [and increasing amounts of information born digital], it is possible to apply data analysis techniques to large collections of diverse cultural heritage resources as well as scientific data.”

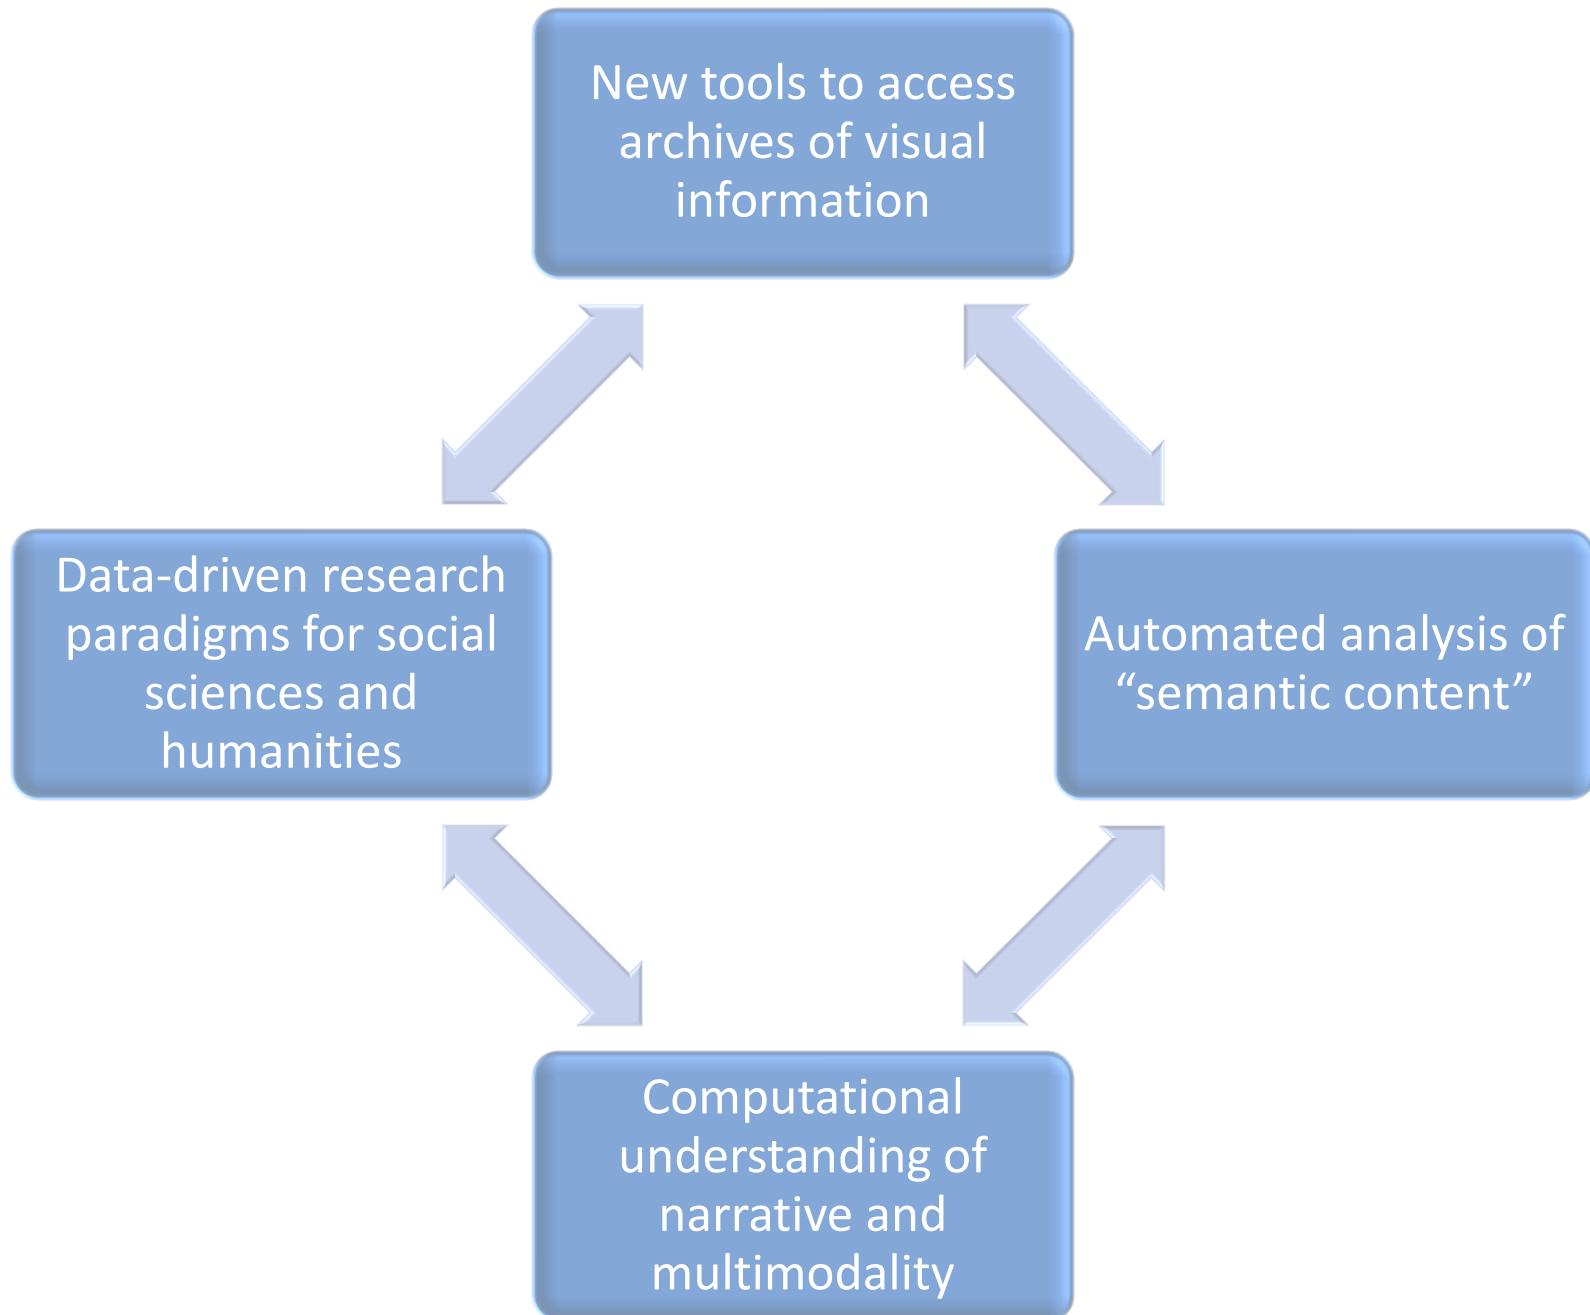

<http://www.diggingintodata.org/>

“Cultural Analytics” at the Software Studies Initiative

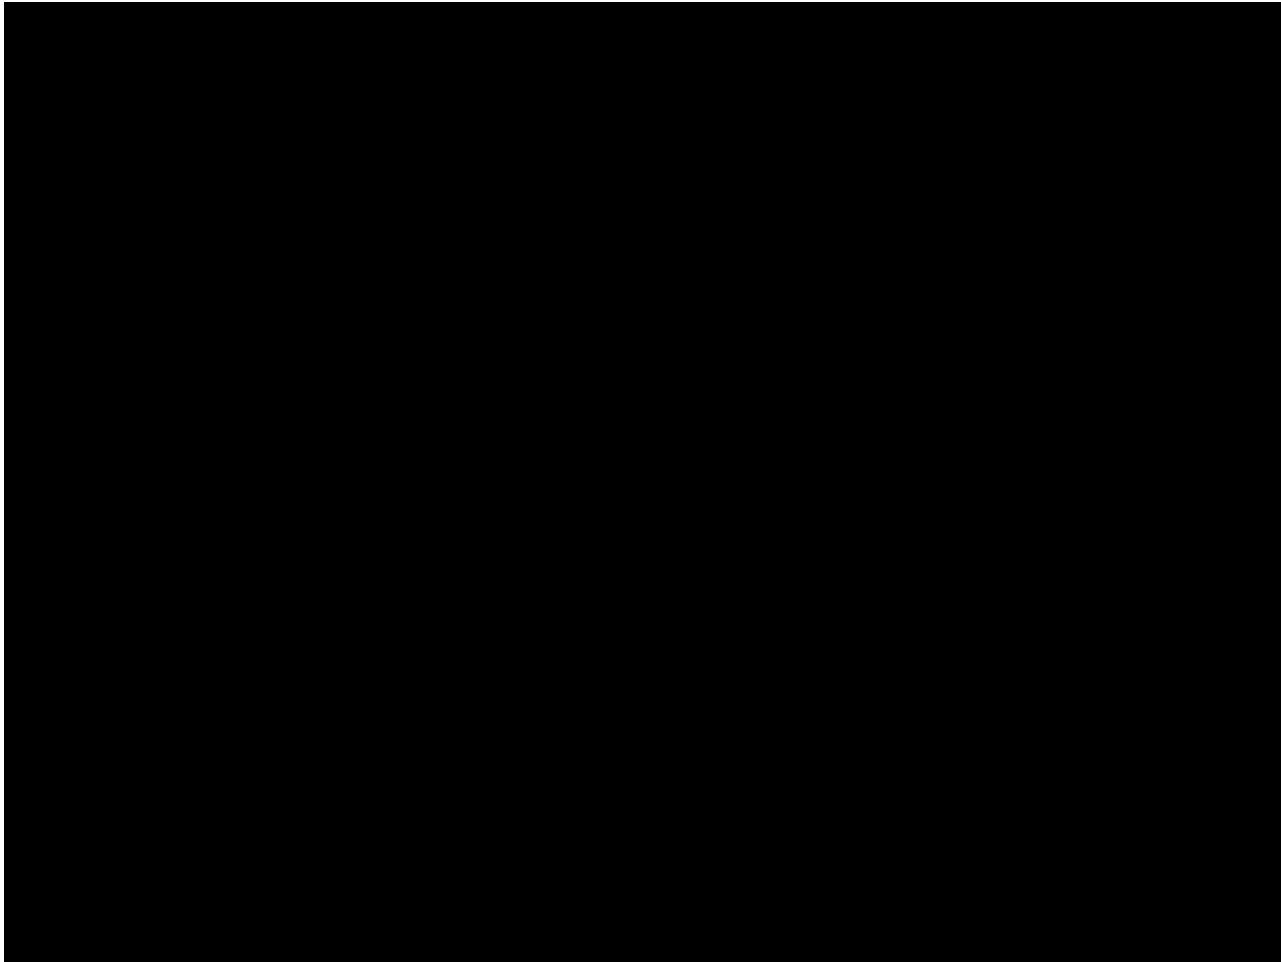

<http://lab.softwarestudies.com/2008/09/projects.html>

Average shot length, feature films 1900-2008

Audio Description (“Synstolking”)

Audio Description (“Synstolking”)

- 00:10:18 A Red Cross convoy drives through an Italian village. Inside one of the lorries Hana leans over the wounded pilot.
- 00:10:35 A jeep drives up alongside.
- 00:10:59 Hana passes Jan some banknotes.
- 00:11:12 Laughing, Jan falls back into her seat as the jeep overtakes the line of lorries.
- 00:11:18 An explosion on the road ahead.
- 00:11:24 The jeep has hit a mine.
- 00:11:27 Hana jumps from the lorry.
- 00:11:35 Desperately she runs towards the mangled jeep.
- 00:11:42 Soldiers try to stop her.
- 00:11:46 She struggles with a soldier who grabs hold of her firmly.
- 00:12:02 Later, beside the destroyed jeep, two mine detecting devices sweep the road.

Audio Description (“Synstolking”)

- 00:10:18 A Red Cross convoy drives through an Italian village. Inside one of the lorries Hana leans over the wounded pilot.
- 00:10:35 A jeep drives up alongside.
- 00:10:59 Hana passes Jan some banknotes.
- 00:11:12 **Laughing**, Jan falls back into her seat as the jeep overtakes the line of lorries.
- 00:11:18 An explosion on the road ahead.
- 00:11:24 The jeep has hit a mine.
- 00:11:27 Hana jumps from the lorry.
- 00:11:35 **Desperately** she runs towards the mangled jeep.
- 00:11:42 Soldiers try to stop her.
- 00:11:46 She **struggles** with a soldier who grabs hold of her firmly.
- 00:12:02 Later, beside the destroyed jeep, two mine detecting devices sweep the road.

Detecting emotions in Films, via Audio Description (Salway and Graham 2003)

- Based on a cognitive theory of emotion (Ortony, Clore and Collins 1988) which defines 22 types of emotion in terms of beliefs and goals.
- 627 emotion tokens selected for 22 emotion types, using WordNet – an electronic thesaurus (<http://wordnet.princeton.edu/>).

Detecting emotions in Films, via Audio Description (Salway and Graham 2003)

JOY - euphoria, elation, happy, jolly, pleased

DISTRESS - distraught, anguished, miserable, depressed

LIKE - love, passionately, adoration, fondness

DISLIKE - hatred, loathing, disgust, aversion, distaste

HOPE - anticipation, excited, expectant, optimistic,

FEAR - terrified, panicked, worried, concerned

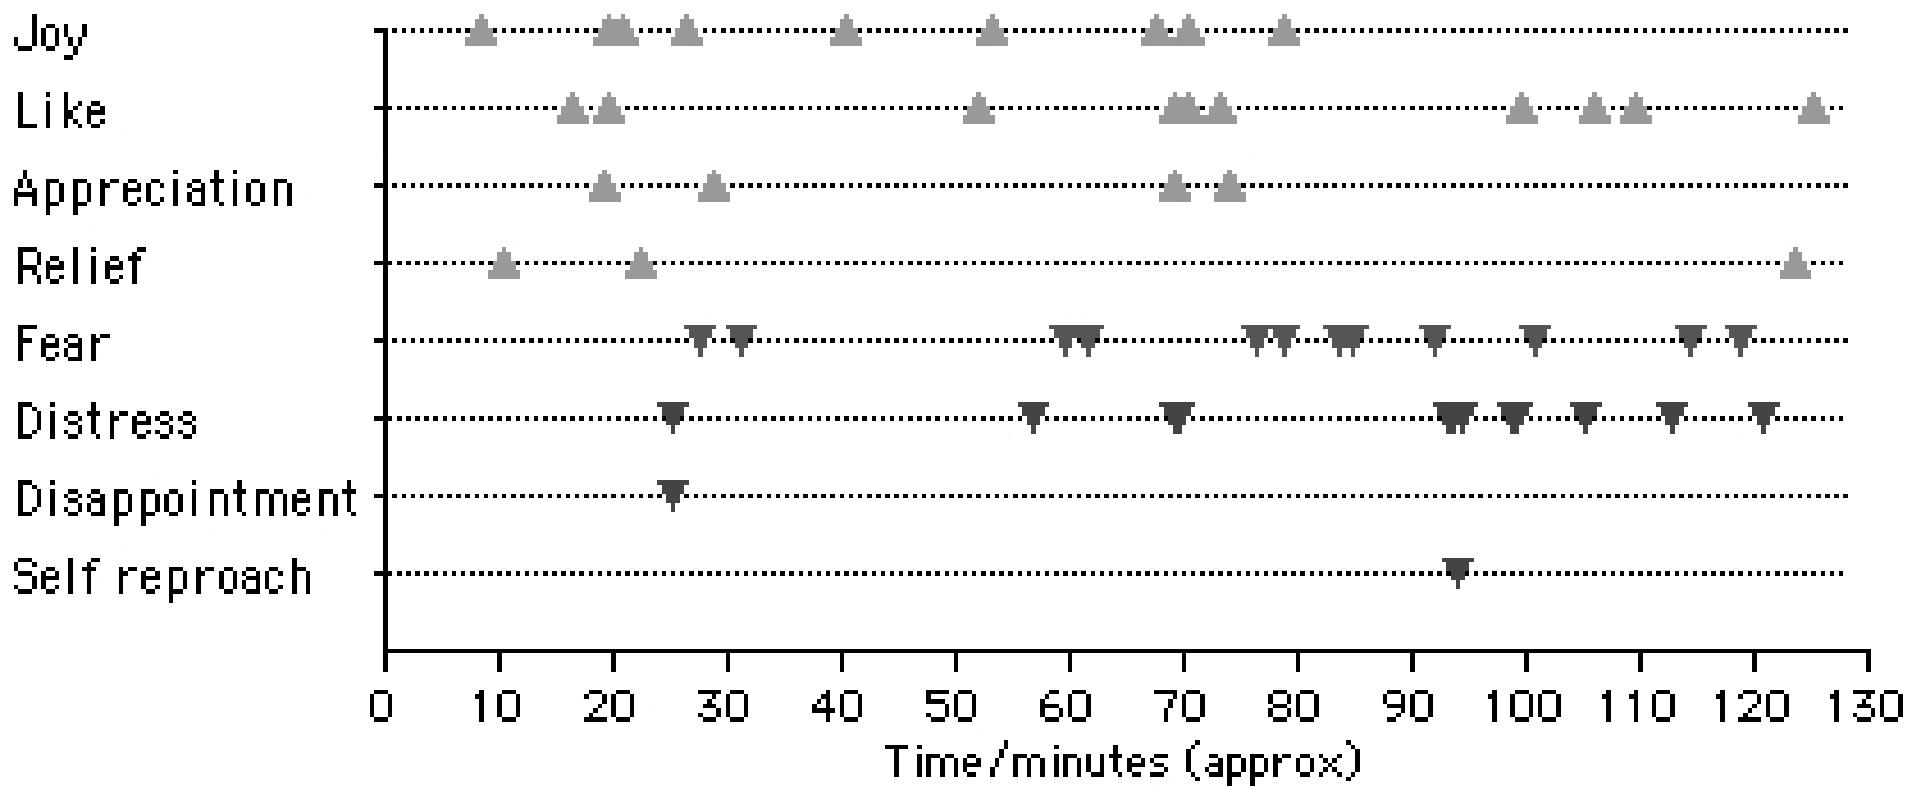

Captain Correlli's Mandolin (dir. John Madden, 2001)

15-20 minutes: Pelagria's betrothal to Madras

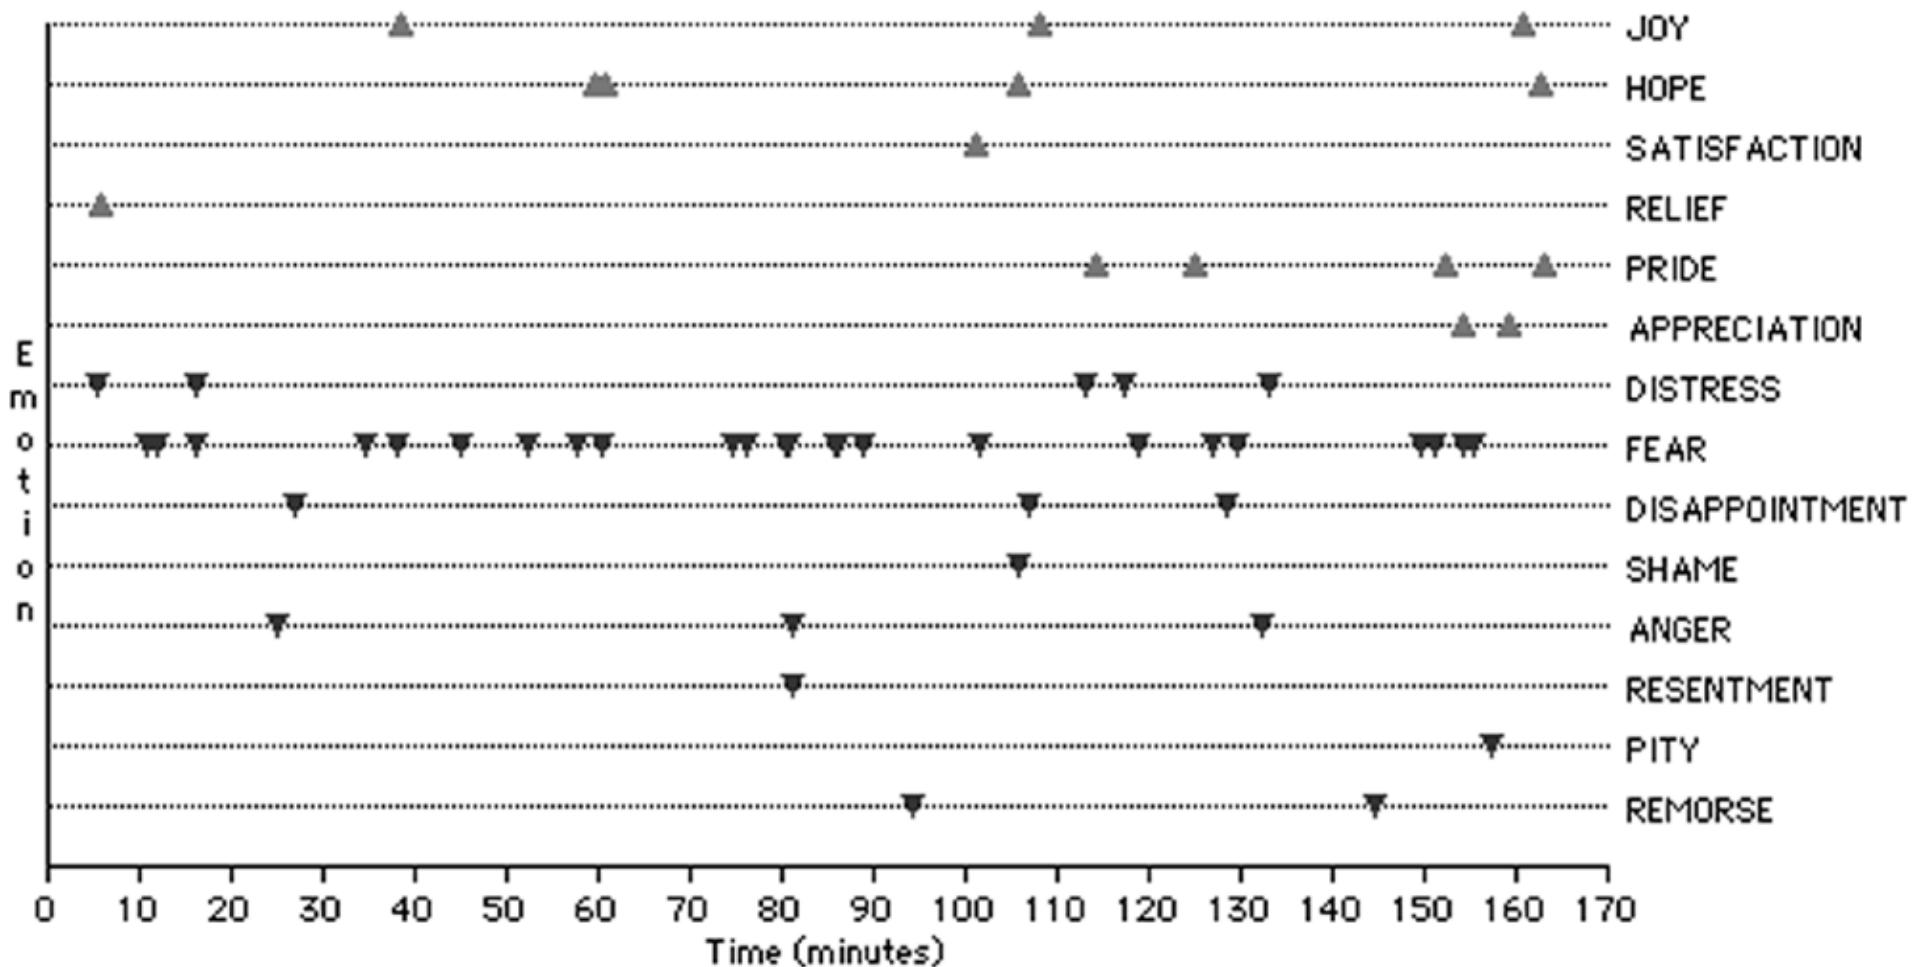

20-30 minutes: invasion of the island

68-74 minutes: Pelagria and Correlli's growing relationship

92-95 minutes: German soldiers disarm Italians

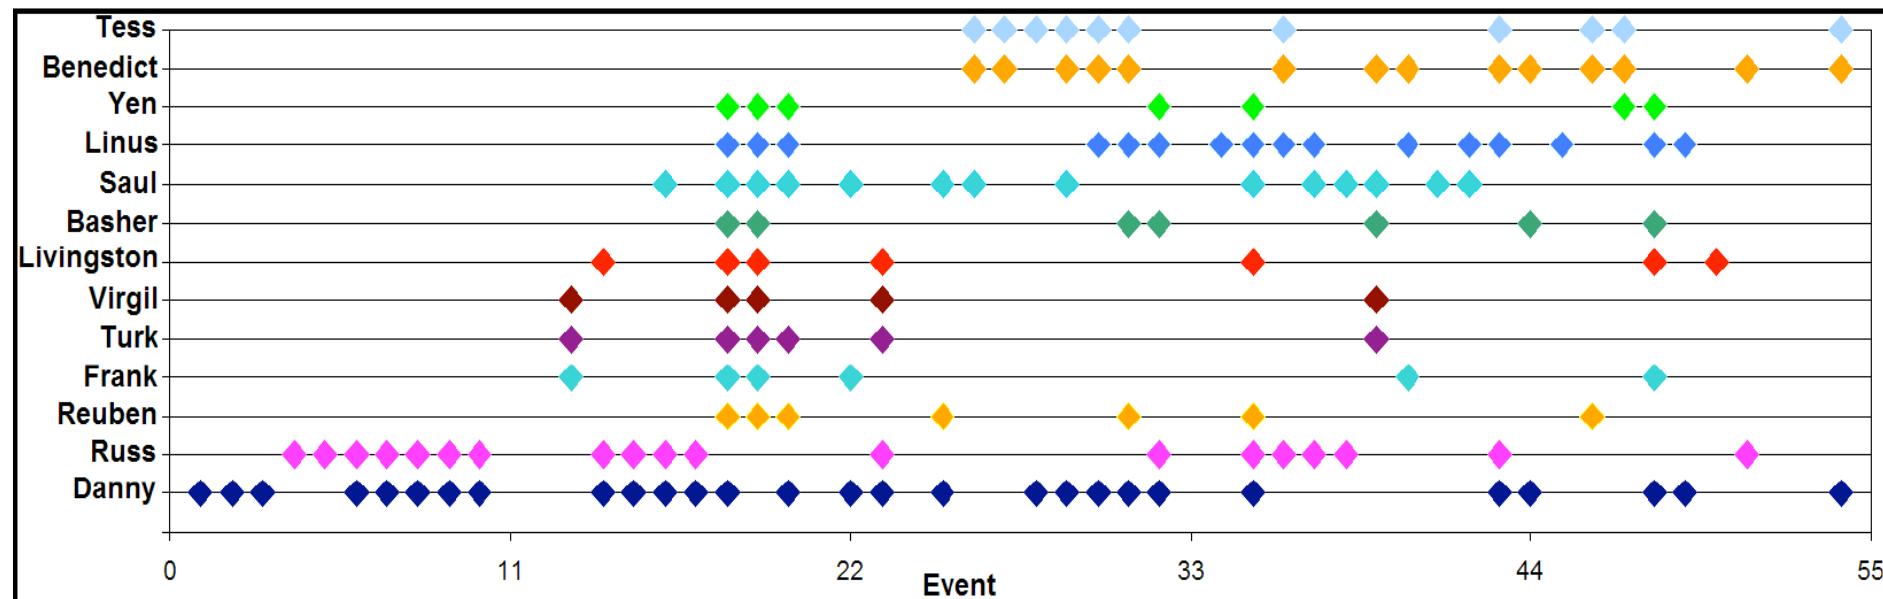

The Postman (dir. Kevin Costner, 1997)

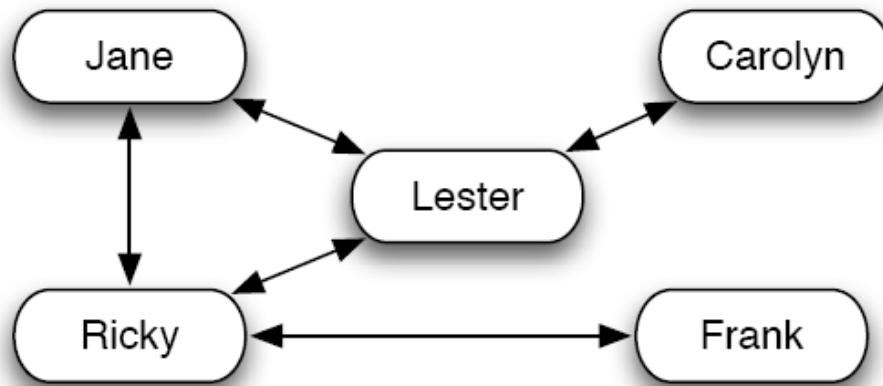

Characters' Appearance in Films (Salway, Lehane and O'Connor 2007)

Ocean's Eleven (dir. Steven Soderbergh, 2001).

Characters' Co-occurrence in Films

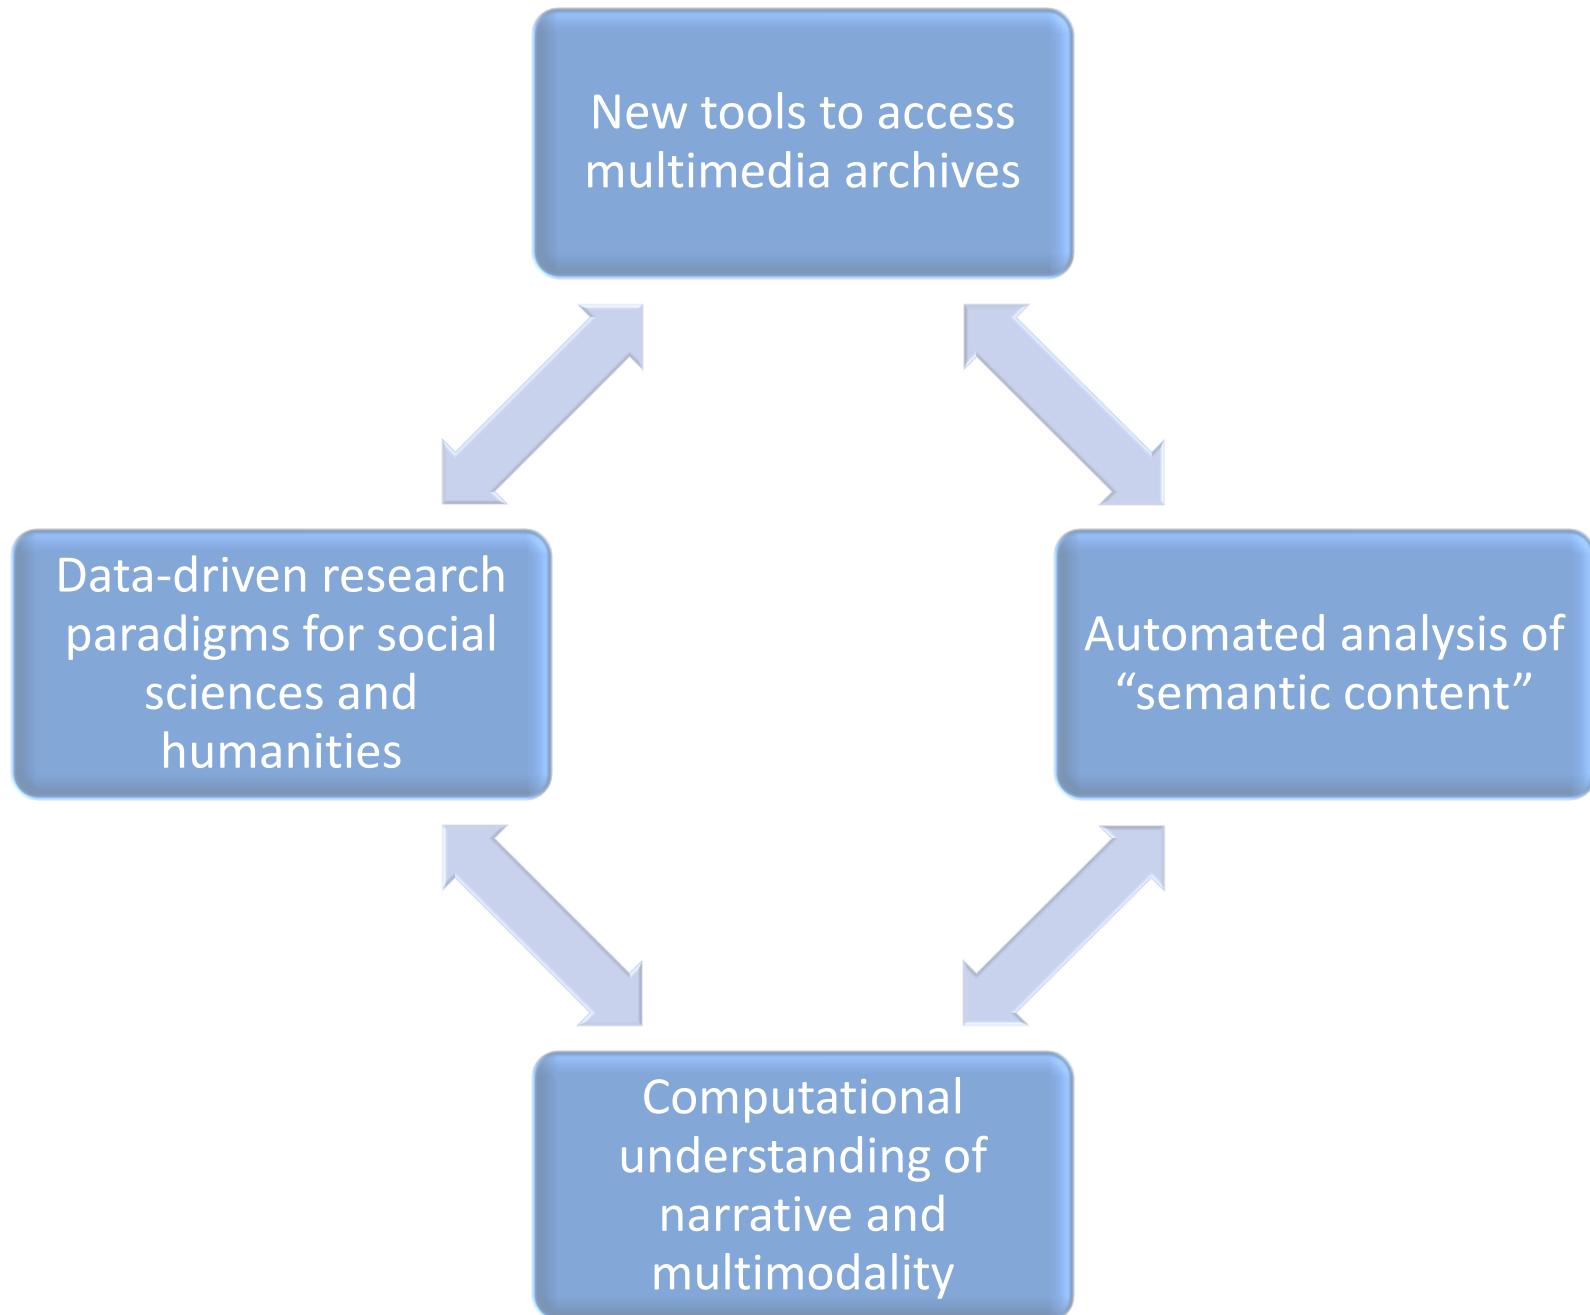

(Salway, Lehane and O'Connor 2007)

American Beauty
(dir. Sam Mendes, 1999)

The English Patient
(dir. Anthony Minghella,
1996)

A data-driven paradigm

Use a computer to identify unusually frequent forms in corpora of multimodal narratives, then:

- (i) develop theory to account for the occurrence of these forms in terms of their functions;
- (ii) automatically generate databases of these forms / functions for further analysis.

What do people say in films?

(Lingabavan and Salway 2006)

“I don't know”

“I'm gonna X”, “I am going to X”

“I wanna X”, “I want to X”

“I gotta X”

Some common phrases in film scripts and audio descriptions

(Salway, Vassiliou and Ahmad 2005; Vassiliou 2006; Salway 2009)

“X looks Y-ed / Y-ly”

“X looks at Y”

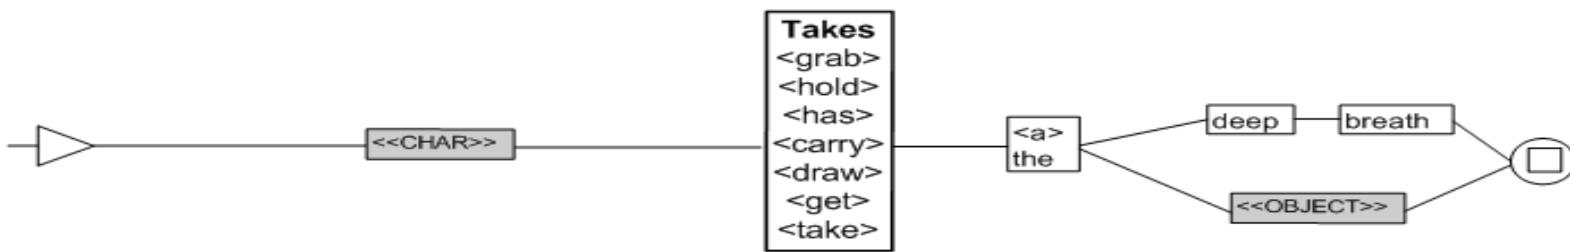

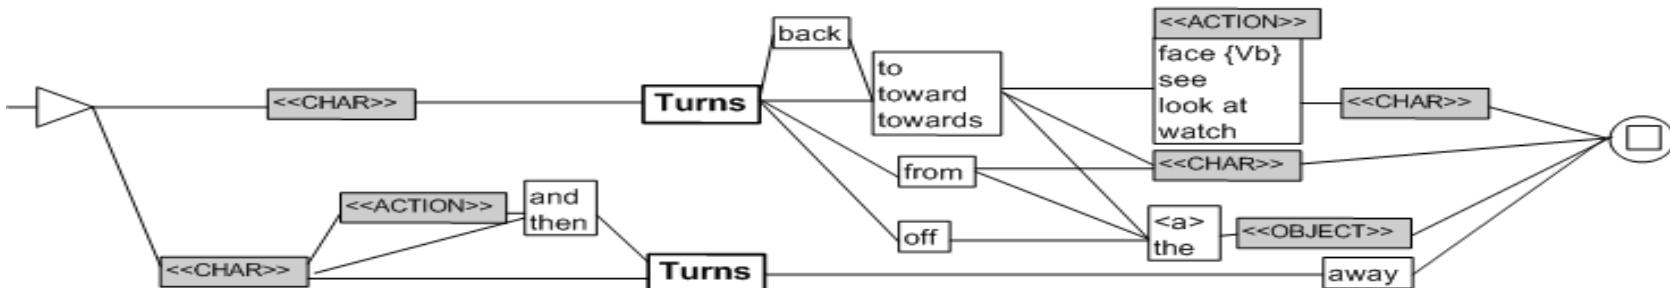

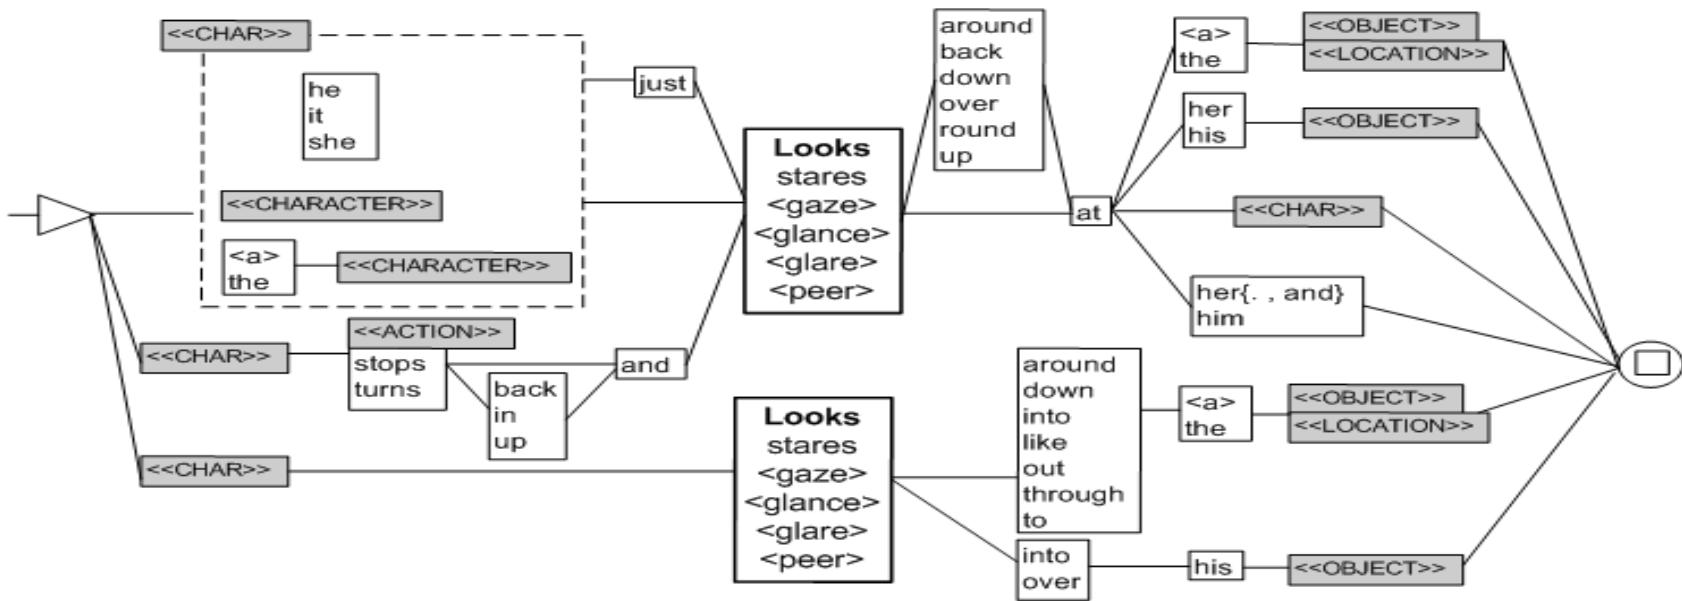

“X goes to the Y”

“X opens the door and leaves”

“X nods his/her head”

<i>directly</i>	9
<i>anxiously</i>	8
<i>sadly, steadily, thoughtfully</i>	7
<i>nervously</i>	6
<i>fearfully, grimly, longingly, quizzically</i>	4
<i>curiously, slowly</i>	3
<i>blankly, briefly, carefully, frantically, intently, pensively, searchingly, seriously, sheepishly, sympathetically, uneasily, urgently</i>	2
<i>accusingly, appealingly, awkwardly, bitterly, calmly, cautiously, closely, coldly, contemptuously, defiantly, disappointedly, disapprovingly, earnestly, enquiringly, entreatingly, firmly, forlornly, gravely, guiltily, impatiently, incredulously, malevolently, meaningfully, miserably, mournfully, pathetically, pityingly, pleadingly, pointedly, questioningly, quickly, resignedly, sceptically, shakily, sharply, shyly, solemnly, surreptitiously, tenderly, unsurely, vacantly, warily, wistfully</i>	1

FOCUS OF ATTENTION

Corpus-driven Information Extraction

(Salway, Vassiliou and Ahmad 2005; Vassiliou 2006; Salway 2009)

CFOA ID	Focus Type	Character Focussing	Character Focussed On	Object Focussed On	Occurrence Time	Text String
FOAAD5	ACTIVE	Jim		(their) car	00:15:22:24	00:15:22:24 looking at
FOAAD6	ACTIVE	Carl (He)	Jim		00:23:32:07	00:23:32:07 turns to see
FOAAD7	PASSIVE	Jim		the gun	00:25:11:36	00:25:11:36 takes

ScCh ID	INT\TEXT	Location	Time of Day	Line No.	% Film Time	Text String
ScChAD1	Interior	FITTS HOUSE - RICKY'S BEDROOM	Night	2	0.07	INT. FITTS HOUSE - RICKY'S BEDROOM- NIGHT
ScChAD10	Exterior	SALE HOUSE	Day	322	11.25	EXT. SALE HOUSE- DAY

NVC ID	Body Part	Character Communicating	Action Involved	Occurrence Time	Text String
NVCAD9	Head	Madox	shakes	00:25:09:16	00:25:09:16 shakes his head
NVCAD10	Eyes	Caravaggio	closes	00:25:34:20	00:25:34:20 closes his eyes

COL ID	Character State	Character Changing Location	Occurrence Time	Text String
COLAD2	ENTERING	Donkey	00:06:26:17	00:06:26:17 runs into
COLAD3	LEAVING	Donkey	00:10:51:06	00:10:51:06 walks out
COLAD4	WITHINION	Donkey	00:11:55:04	00:11:55:04 walking over to

For discussion...

- How do the different modes (moving image, dialogue, music) each contribute to the depiction of emotion and storytelling in films?
- How is a film related to its “collateral texts”, e.g. screenplay, subtitles, audio description?
- How do the emotions depicted by characters affect the emotional experience of the audience?

Is there a role for computation in research to address these questions?

What are the affordances / limitations of a data-driven research paradigm for visual culture?

TODAY'S NEWS TOP STORIES

OIL PRICE UNCERTAINTY**NEWS**

- Oil rebounds despite stock rises
- Stockpile news drives oil price
- Oil prices rally after fresh fall
- Healthy stocks send oil tumbling

ANALYSIS**Oil still rising**

Growing demand means the era of easy oil is over

- Phantom reserves

- Has production peaked?

- Why are oil prices so high?

- The rocky road to oil riches

- Oil and conflict - a natural mix

BACKGROUND

-  **OPEN** Where the world's oil lies

-  **OPEN** Petrol prices explained

- Opec in profile

- Oil markets explained

- What it was like in 1974

- What will the future hold?

LATEST OIL PRICES

- Brent crude oil

- West Texas Intermediate crude

HAVE YOUR SAY

Work in Multimodality

- We showed how news images can be classified as 'specific person' or 'general person' by humans reliably, and by computers automatically on the basis of low-level image features (Hughes, Salway, Jones and O'Connor 2007)
 - Image brightness, sharpness and colour variation
 - Face detection / size
- We proposed a system of image-text relations to account for the different ways in which visual and verbal information can function together in multimodal documents (Martinec and Salway 2005); drawing on Barthes; Halliday; Kress and van Leeuwen
 - Not a computer-based analysis, but we were considered the limits of computational analysis when specifying realisations of image-text relations
